This session will be based on the TV show Shark Tank, where investors pitch their product ideas to venture capitalists, who in turn provide feedback – and sometimes funding to get a project off the ground and into the marketplace.

Selected early career and trainee researchers who represent diverse/minority groups will be invited to come to pitch their ideas on how to enhance diversity in research to a panel of judges.

Goal: To create an environment that encouraged creativity and sharing toward enhancing diversity in the research workforce.

Prize: \$500 and complimentary registration to PAS
